BRAND IDENTITY GUIDELINES V1.0

SCM SIGNPOST

Technical specifications and visual standards for the global logistics consulting authority.

BRAND LOGIC

PRECISION. ANALYSIS. LOGISTICS.

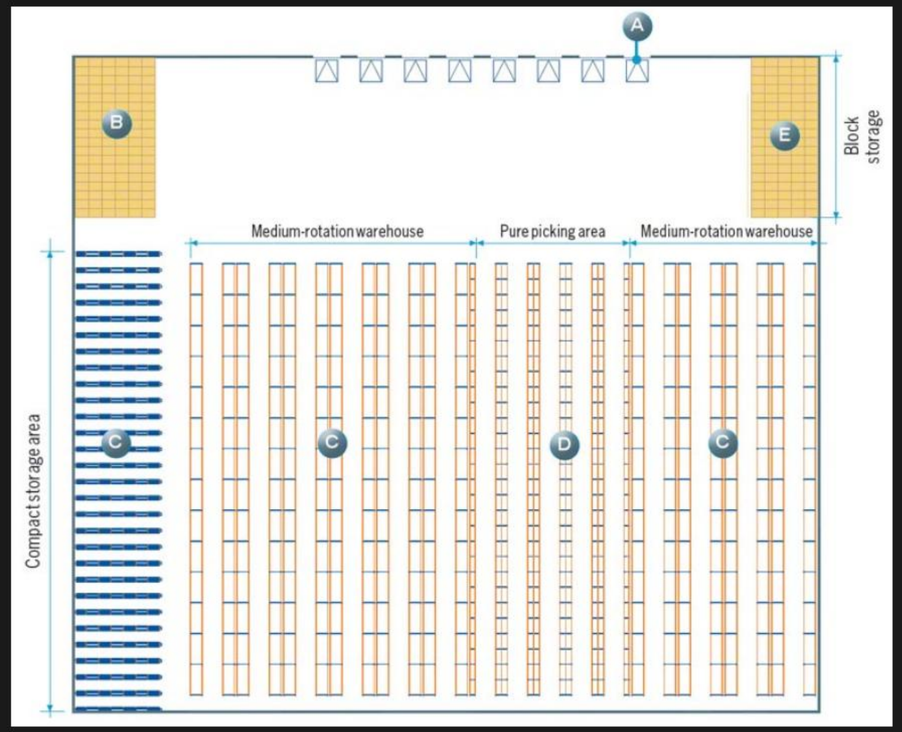
LOGO CONSTRUCTION & GRID

THE GEOMETRY OF FLOW

The SCM Signpost logo is built on a **12×12 modular grid**, inspired by warehouse floor layouts and technical blueprints.

Every line and arrow follows a strict 45-degree or 90-degree angle, ensuring **maximum legibility** at all scales, from micro-labels to large-scale facility signage.

- 2D Flat Vector - No 3D effects
- Centered focal point strategy
- Technical line-weight consistency



CORE BRAND VALUES

ANALYTICAL

We approach logistics through data and raw technical precision. No fluff, just results.

FUNCTIONAL

Design that serves a purpose. Every element must aid in the efficiency of the supply chain.

DIRECTIONAL

We provide the signpost. We define the path for complex multi-modal transportation networks.

THE COLOR SYSTEM

60%
ANTHRACITE GRAY
HEX #262626

30%
SIGNAL YELLOW
HEX #FFD700

10%
PURE WHITE
HEX #FFFFFF

Colors are selected for high-visibility in industrial environments and modern digital interfaces.

TYPOGRAPHY SYSTEM

PRIMARY: INTER

ABCDEFGHIJKLM

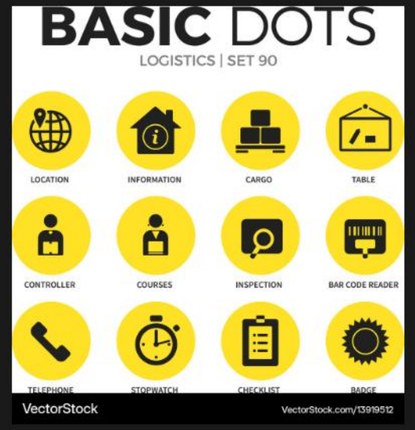
Used for all body text and UI components. High legibility and modern geometric construction.

TECHNICAL: ROBOTO MONO

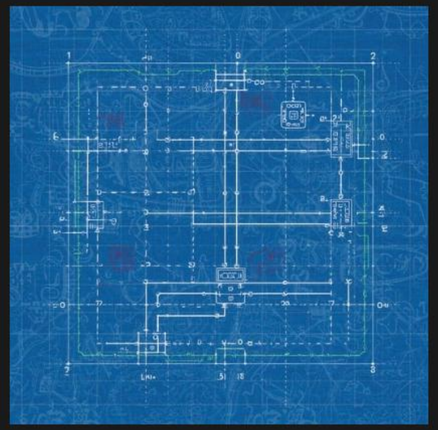
STUVWXYZ 0123

Used for headings, data points, and technical labels. Resembles warehouse shipping labels and code.

ICONOGRAPHY STYLE



System Icons



Technical Markings

Abstract industrial background

Graphic Patterns

IMAGERY STANDARDS

INDUSTRIAL GRIT

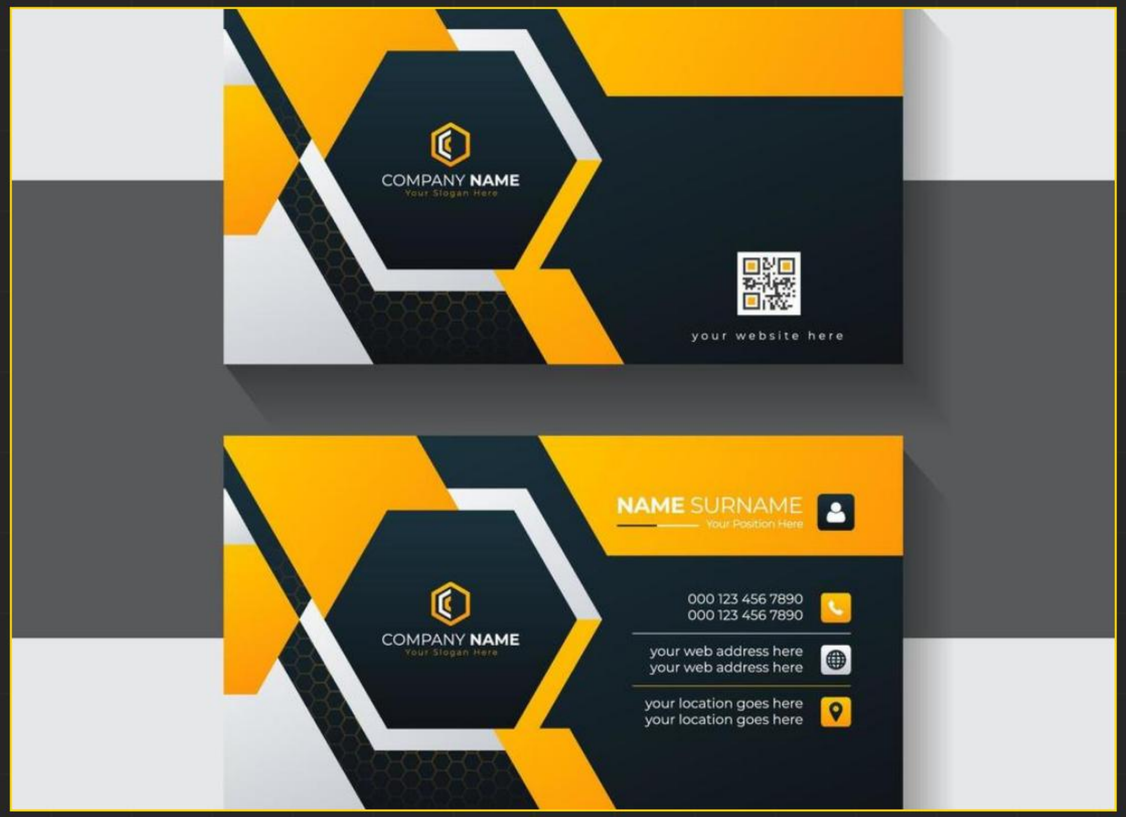
Photography must reflect **real-world logistics**. High contrast, technical focus, and "anthracite" atmosphere.

Avoid generic office stock photos. Focus on scale, machinery, and the architecture of movement.

LOGO SPECIFICATIONS

APPLICATION TYPE	MIN. SIZE (PRINT)	MIN. SIZE (DIGITAL)	CLEAR SPACE (X)
Primary Logo	15mm width	60px width	100% of 'S' height
Monochrome Tag	10mm width	40px width	50% of 'S' height
Icon Only	8mm width	24px width	Fixed Grid-Unit

BRAND APPLICATIONS



From technical warehouse labels to high-end consulting stationery.

PRESENTATION GUIDELINES

- ☑ **Layout Grid:** Use a strict 4-column or 12-column grid system for all slide content.
- ☑ **Data Visualization:** Charts must use Signal Yellow for the primary data series and White for secondary lines.
- ☑ **Emphasis:** Use Signal Yellow highlighting for critical numbers or key findings.
- ☑ **Imagery:** One hero image per slide maximum to maintain focus on technical data.
